

I CLAIM:

1. A method of eliminating sludge, comprising:
 - introducing a waste activated sludge effluent into a first cell;
 - treating said effluent aerobically in said first cell for a first predetermined period of time and anaerobically for a second predetermined period of time;
 - moving said effluent into a second cell;
 - treating said effluent aerobically in said second cell for a third predetermined period of time and anaerobically for a forth predetermined period of time;
 - moving said effluent into a third cell;
 - treating said effluent aerobically in said third cell for a fifth predetermined period of time and anaerobically for a sixth predetermined period of time; and
 - reclaiming said effluent as water.
